KHIZAR STUDIO / ART DIRECTION / REVIEW 01

The Open Frame.

Seven connected visual experiences.
Composition and motion designed together.
Midnight navy. Warm ivory. Champagne light.

01 Immersive Hero + existing laptop

02 Capabilities → ivory Services

03 Large project screens

04 About + studio values

05 Connected four-stage Process

06 Working principles + FAQ

07 Cinematic Contact + Footer

PROPOSED · NOT IMPLEMENTED

Ten composition states, desktop and mobile. Original project imagery and existing laptop reference.

Application unchanged at 2ca49ed. Batch A refinements and Batch B remain paused.

Architecture provides continuity. Typography protects the reading space.

Midnight navy	Warm ivory	Champagne	Ivory ink	Secondary ink	Bronze	Warm white
#0b1018	#eee9df	#d6b780	#152233	#4c5965	#725735	#f4f1e9

Retain the brand

Manrope display + Inter reading typography. Strong asymmetry, controlled measures and purposeful scale. Existing content, real concept projects and the working laptop remain.

Desktop: 80px outer rail at 1440px. Mobile: 24px rail at 390px. Fine rules replace repeated enclosing cards.

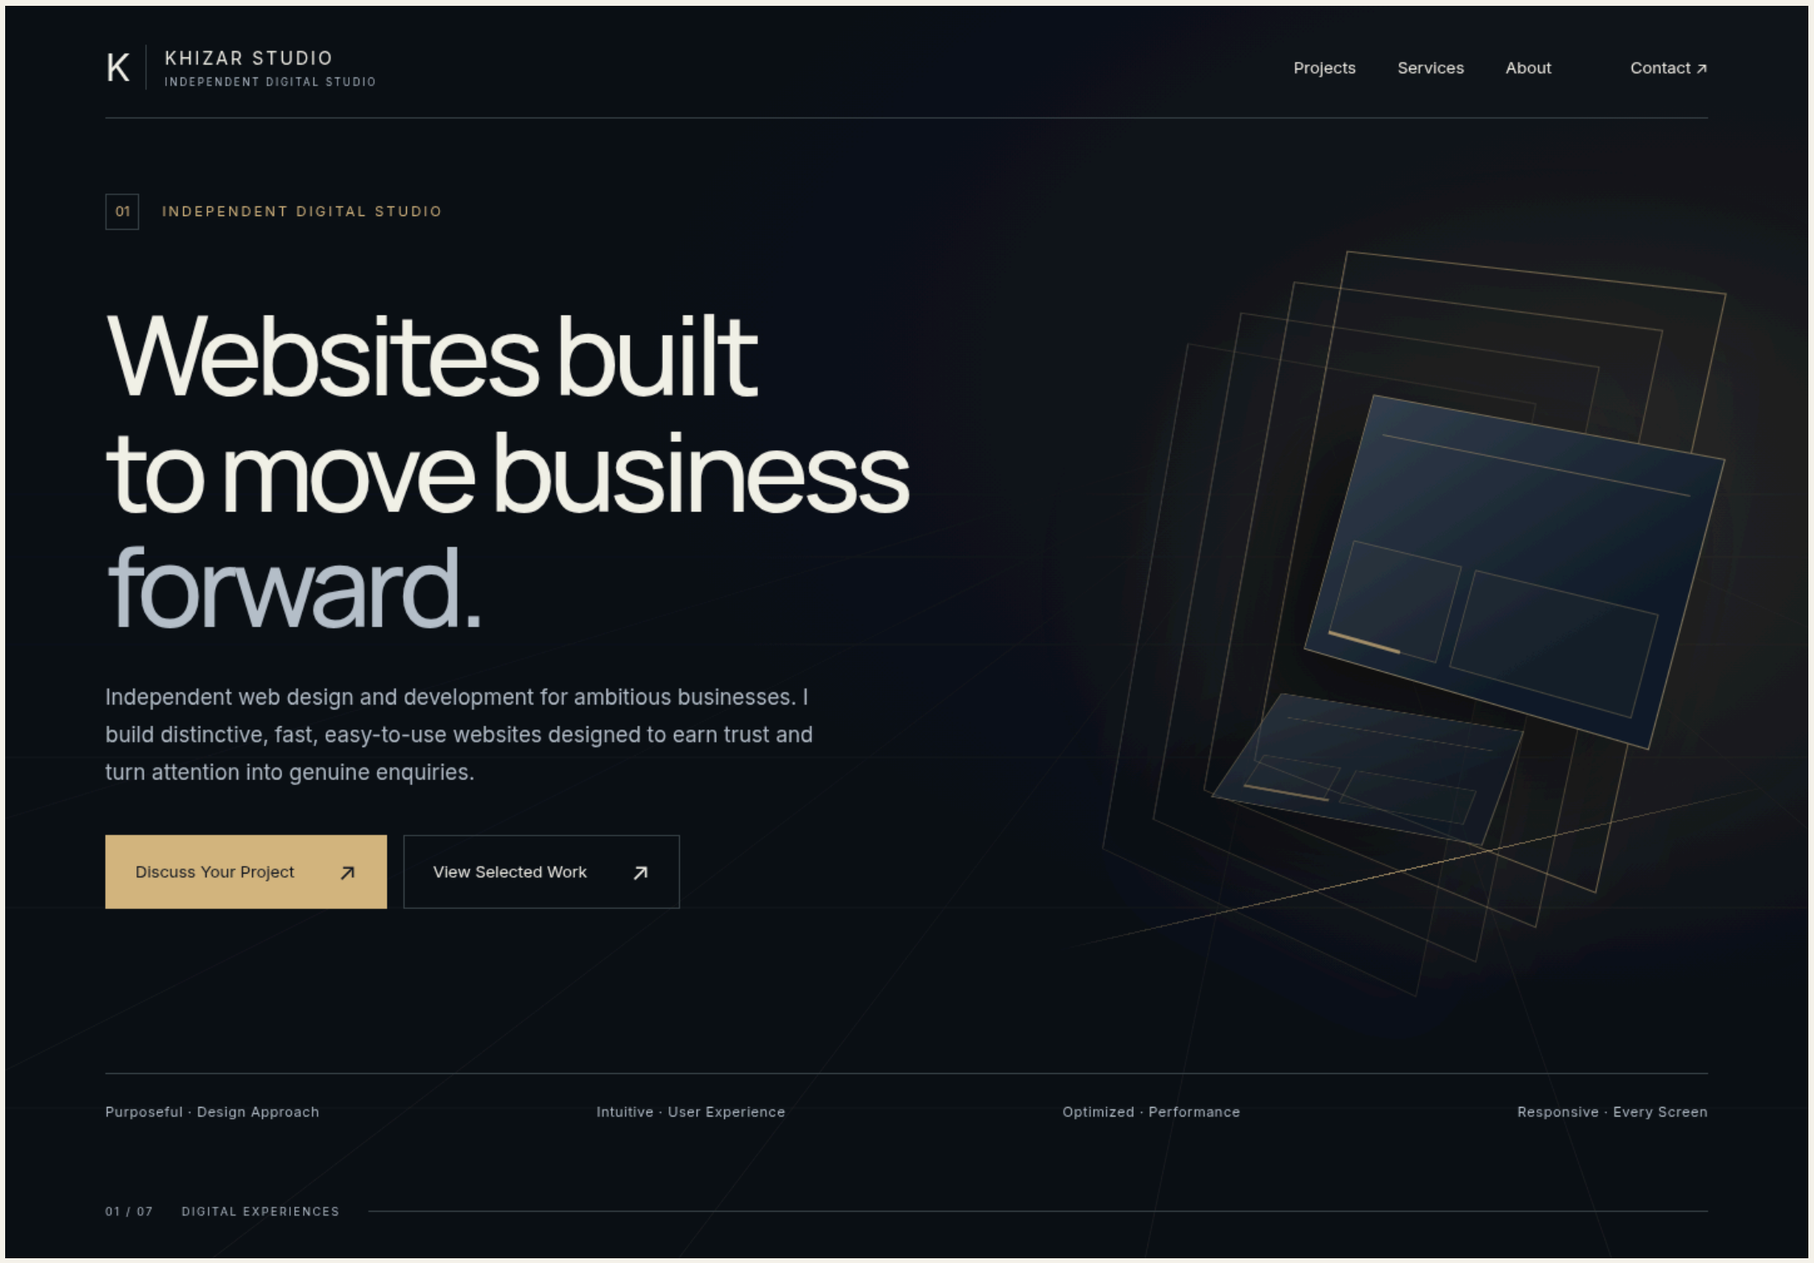

Redesign the compositions

One aperture becomes a stage, a structure, a rule, a ground plane and a path. Perspective belongs to artwork, not paragraphs. Calm sections are intentionally calm.

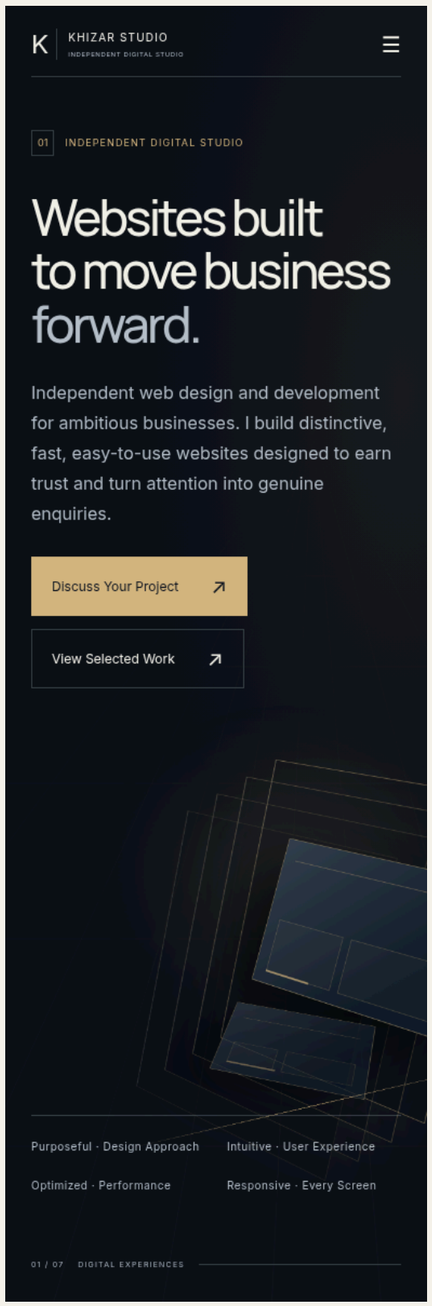

Champagne is lighting and emphasis. Use bronze for small text on ivory. Solid reading-color pairs exceed 4.5:1; full implementation still requires accessibility QA.

01A · The architectural opening

DESKTOP / 1440PX WIDTH

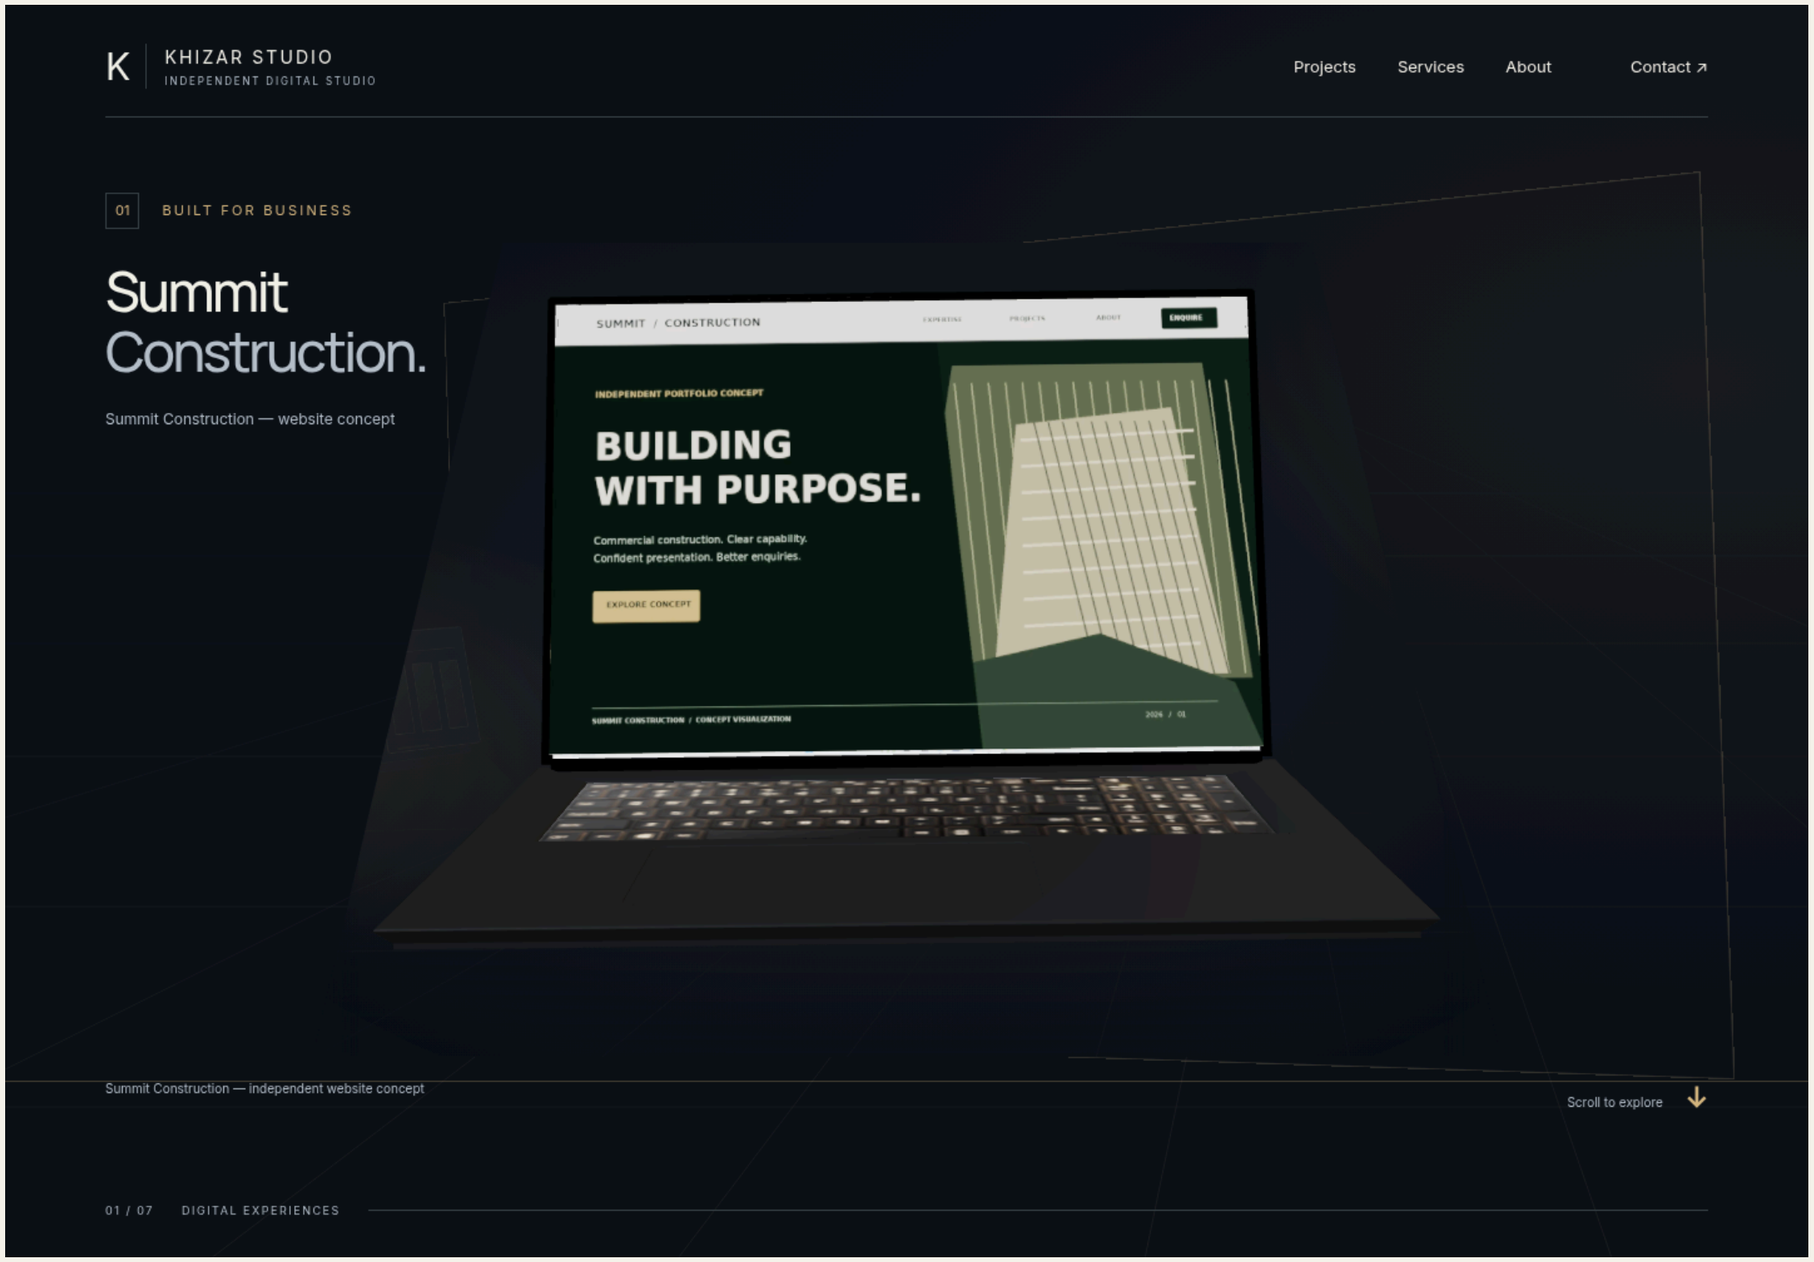

MOBILE / 390PX WIDTH

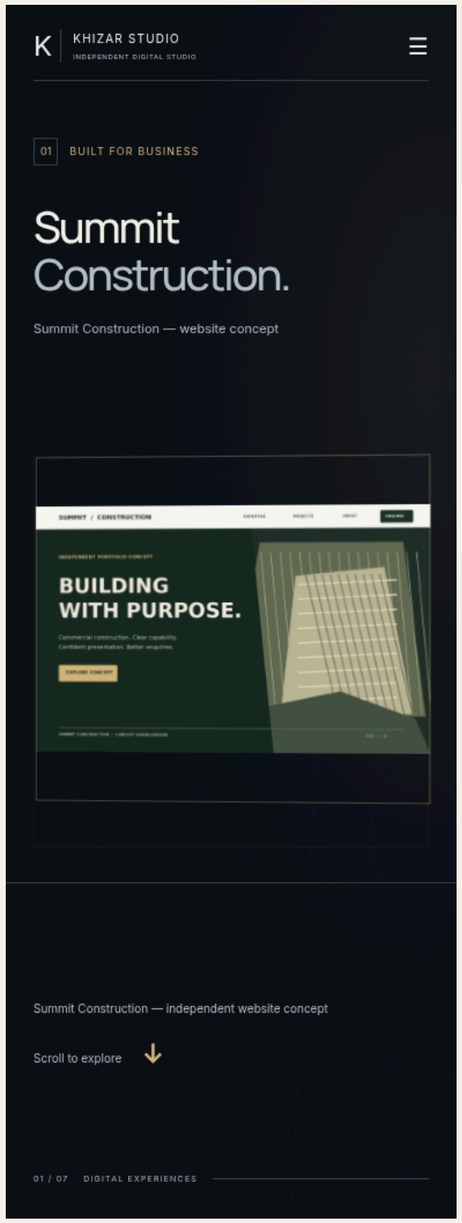

Arrival holds. The architecture changes depth around a fixed reading rail; the central aperture becomes the laptop stage. Mobile places one simplified aperture below the CTA. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

01B · A stage for the existing laptop

DESKTOP / 1440PX WIDTH

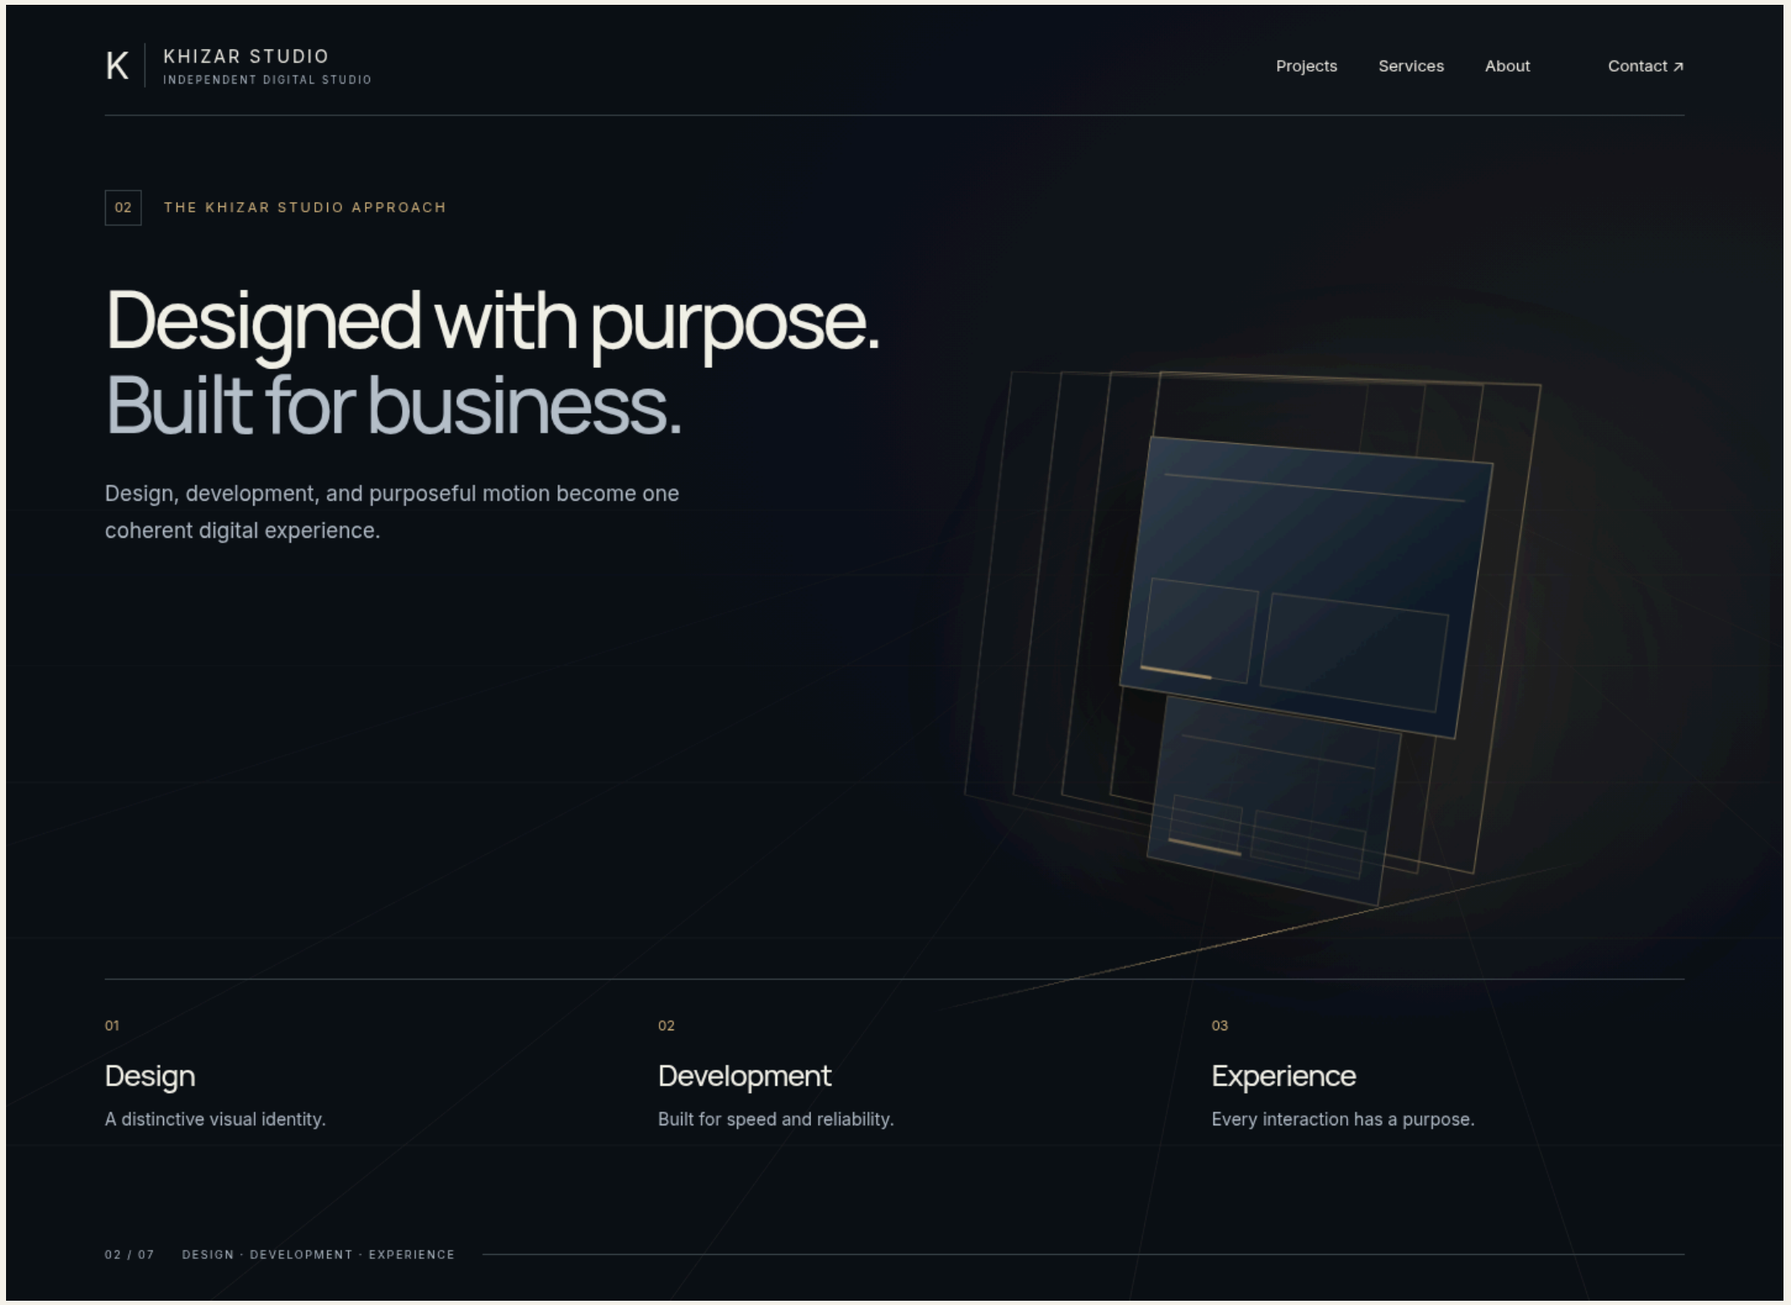

MOBILE / 390PX WIDTH

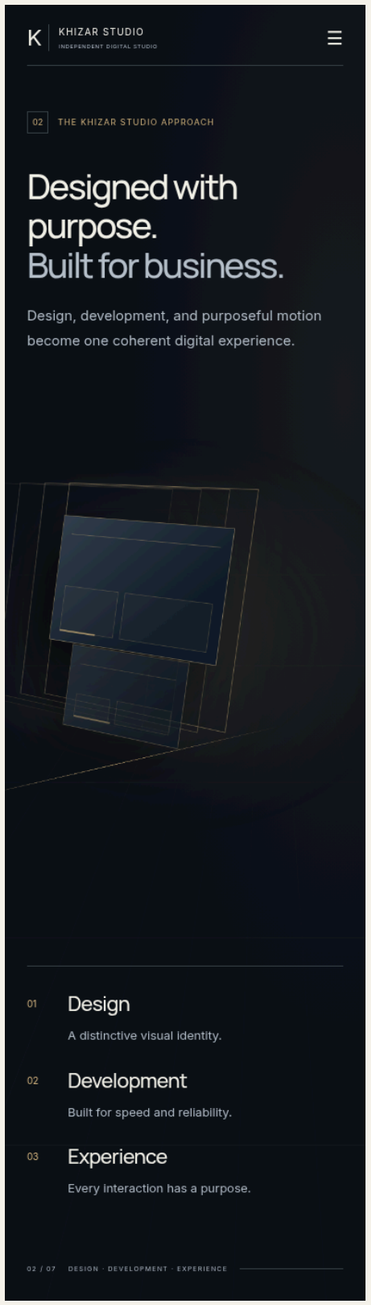

The protected laptop remains the focal object. Surrounding rails settle at its opening, zoom and inspection stages. The pictured laptop is an unaltered screenshot crop of the existing model, not a replacement asset. Mobile uses the existing browser fallback. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

02A · One object, three transformations

DESKTOP / 1440PX WIDTH

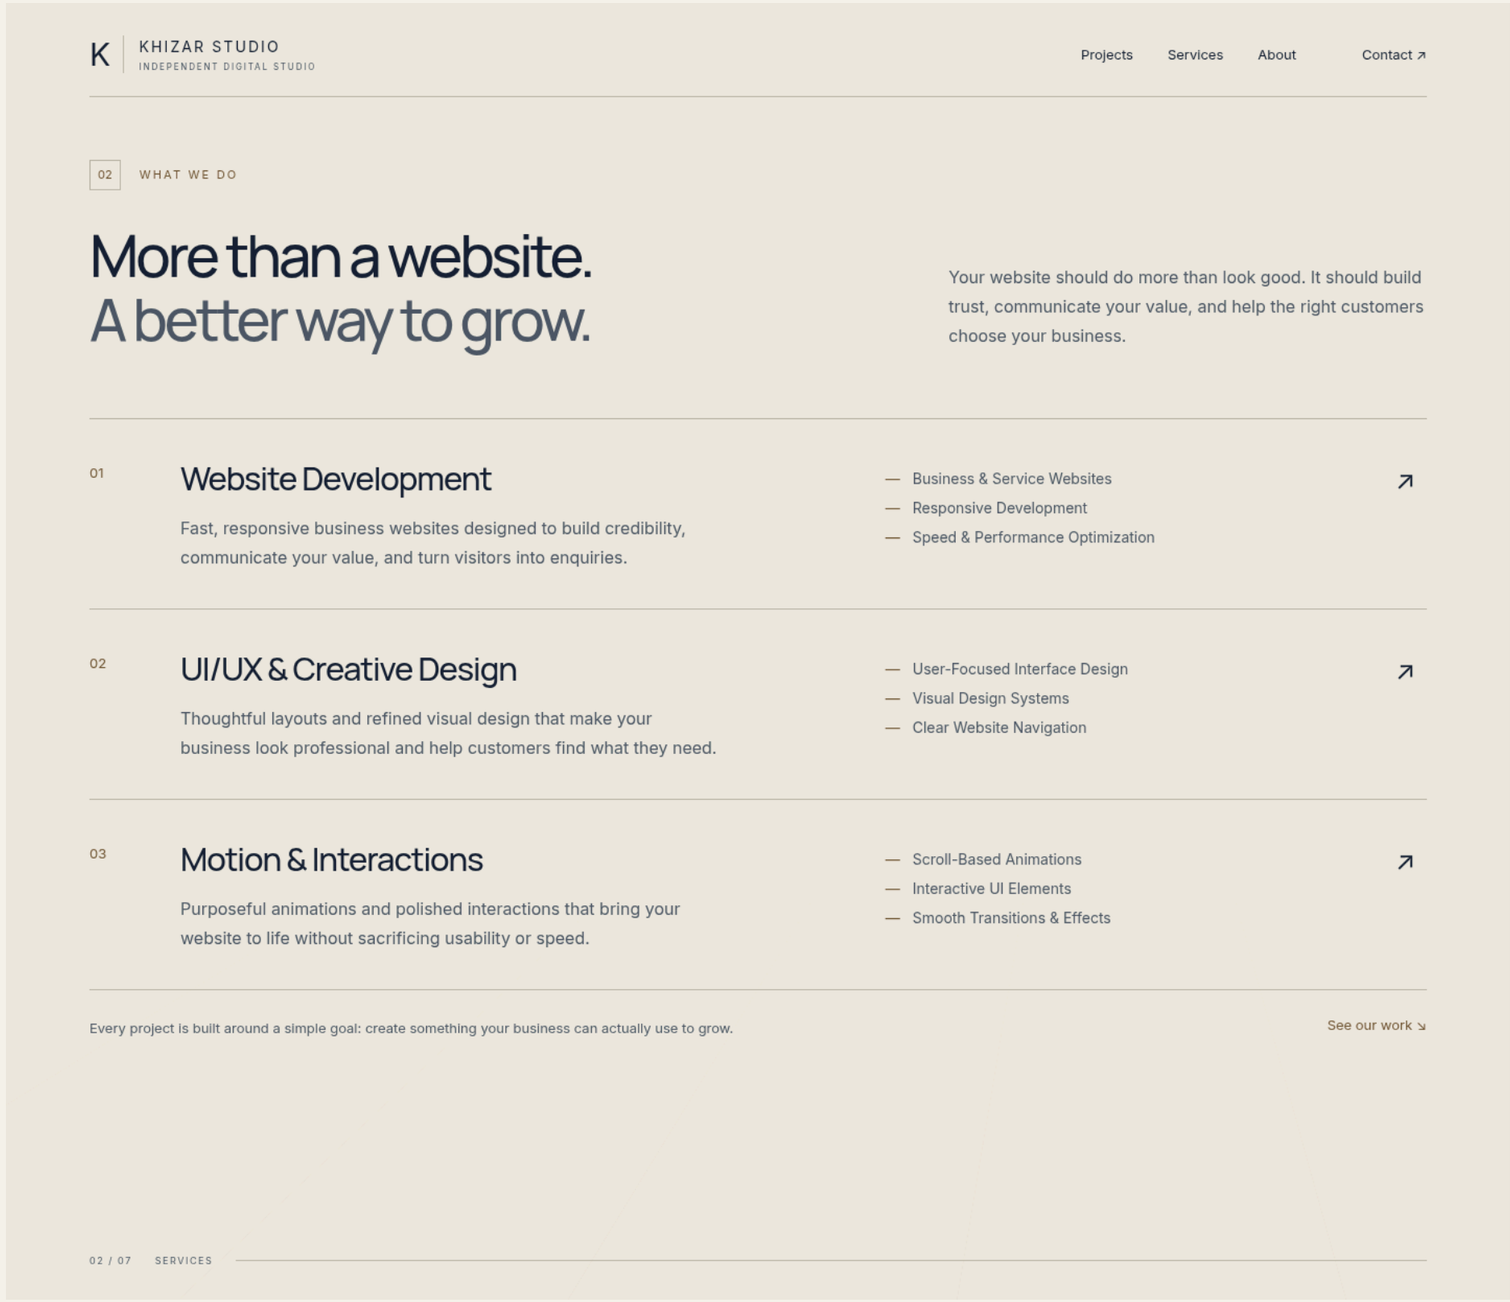

MOBILE / 390PX WIDTH

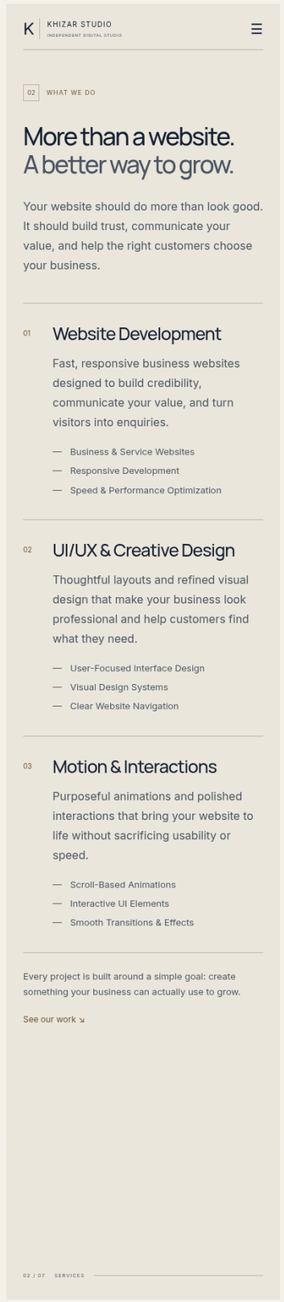

One set of interface planes aligns, connects into structural rails, then resolves into a completed interface. Labels and short descriptions stay settled; they are not attached to moving planes. The terminal rail becomes the service dividers. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

02B · Warm ivory, editorial services

DESKTOP / 1440PX WIDTH

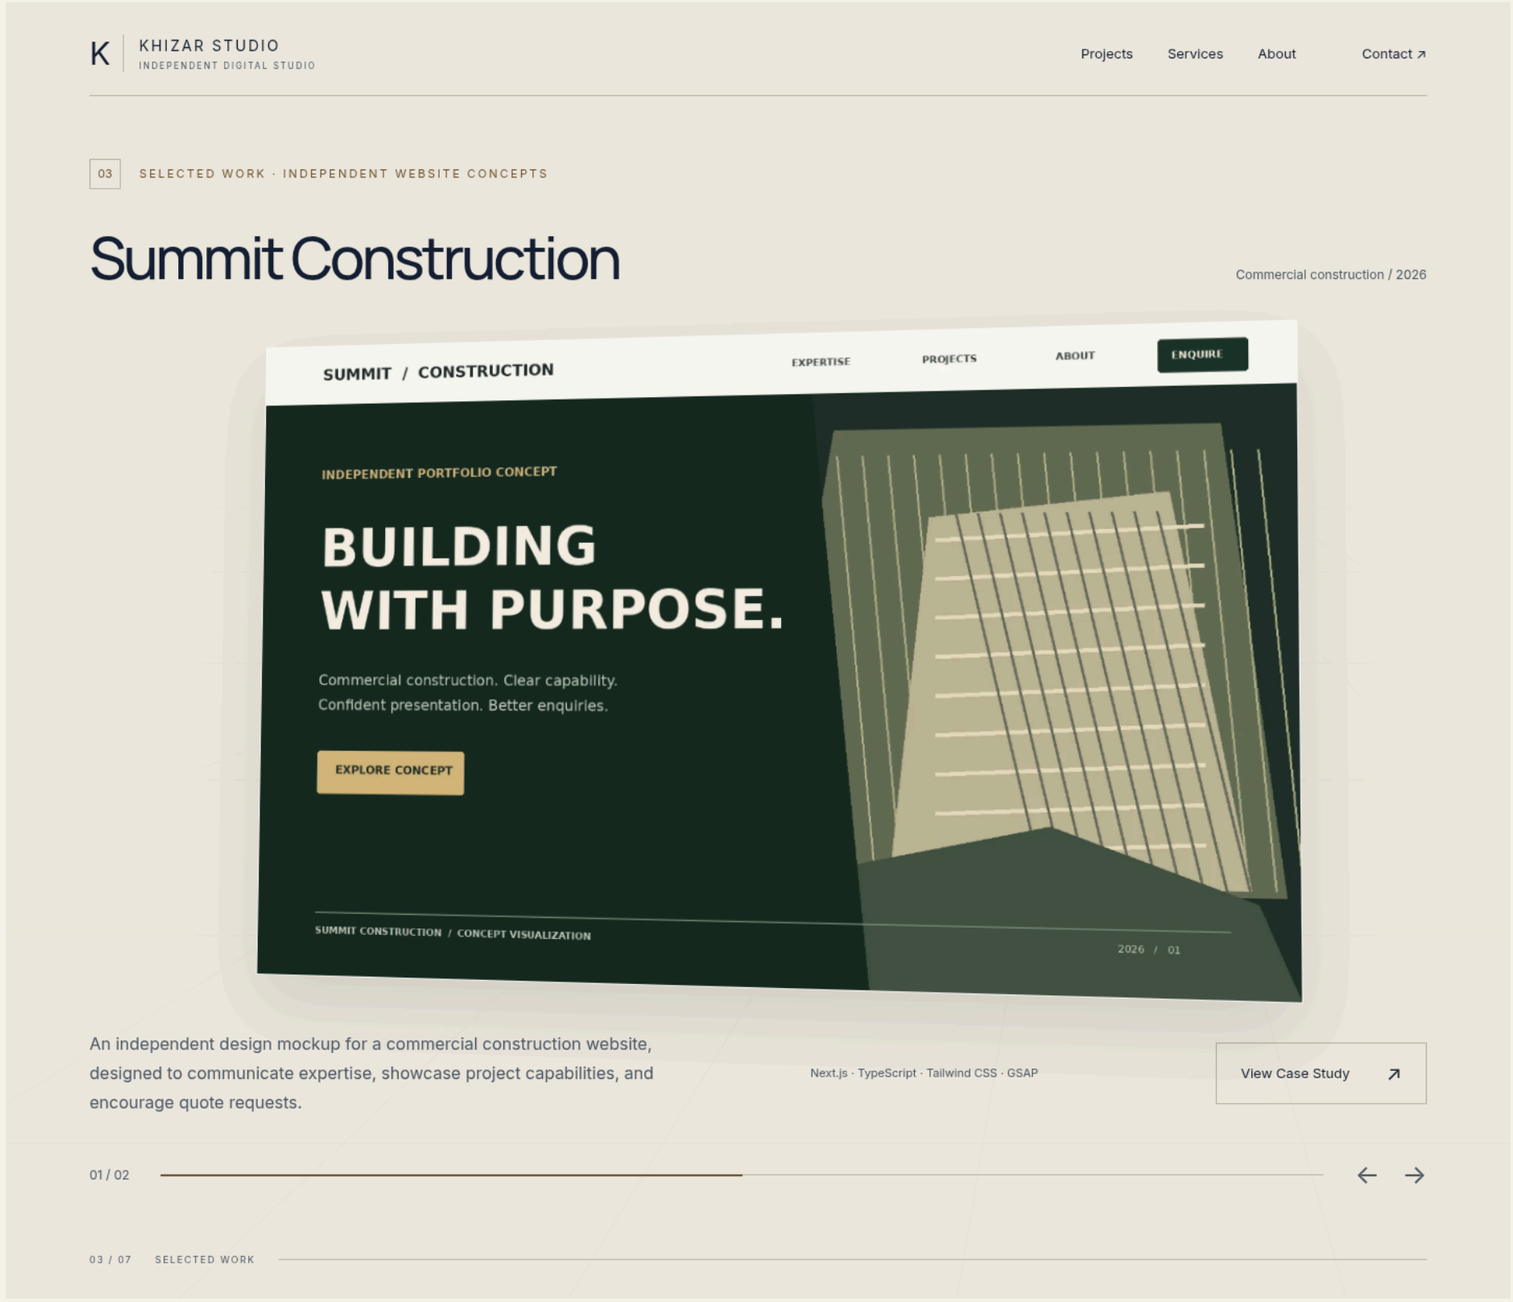

MOBILE / 390PX WIDTH

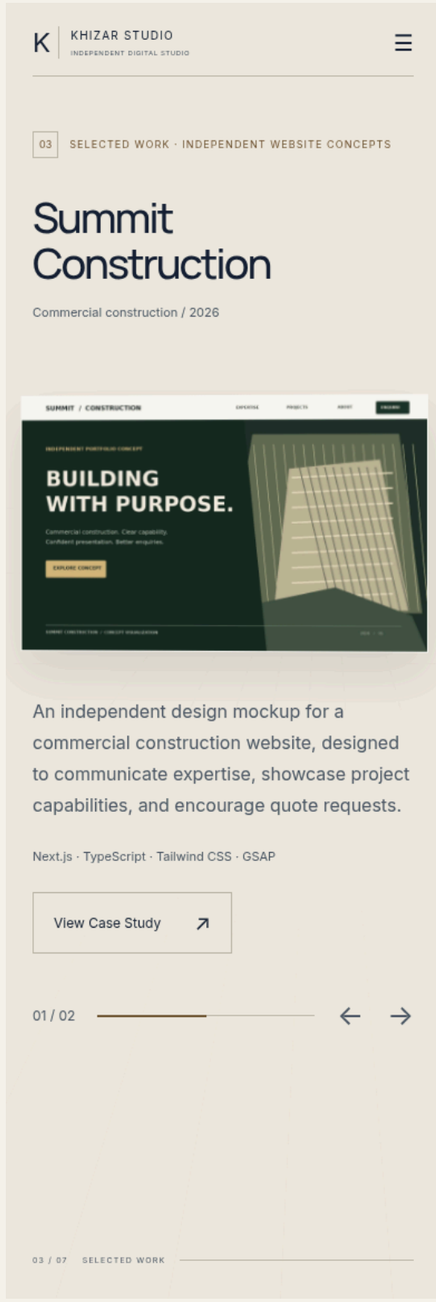

Navy passes through warm stone into ivory while the same guide line remains. Text appears only on the settled surface. Three service rows retain every description and feature; there is no flying-card carousel or extra pin. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

DESKTOP / 1440PX WIDTH

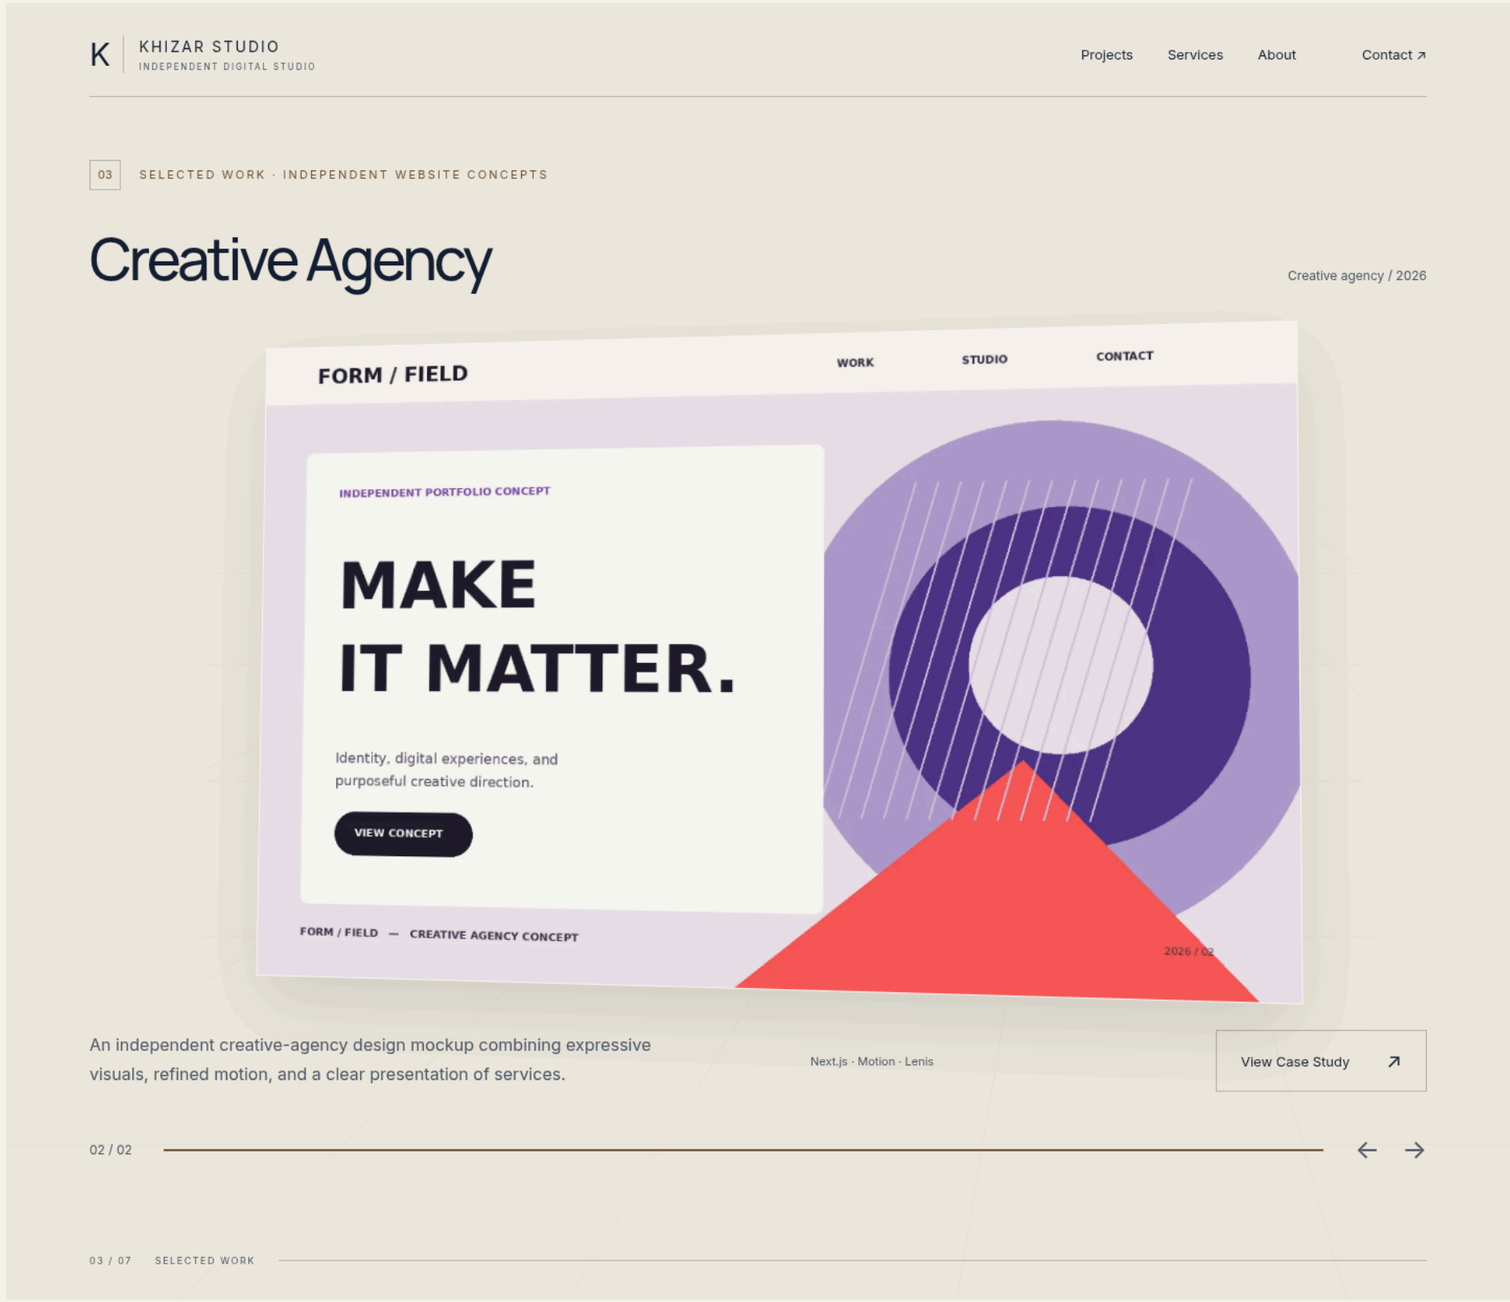

MOBILE / 390PX WIDTH

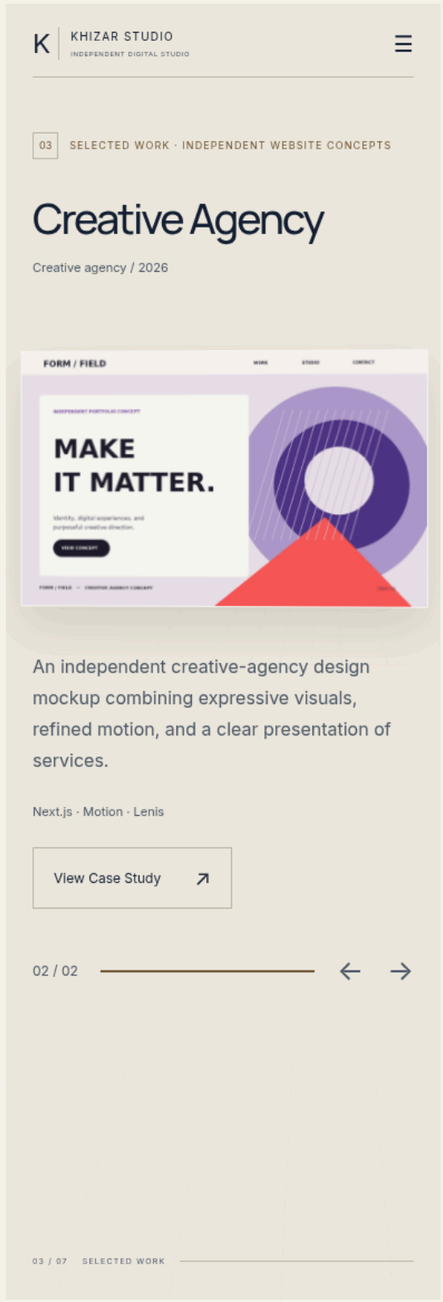

Actual existing project imagery, uncropped and undistorted. A shallow entry tilt settles near front-on for inspection. Copy, concept disclosure, progress, arrows and case-study links remain accessible. These are two states of one showcase, not two new sections. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

03B · The website becomes the object

DESKTOP / 1440PX WIDTH

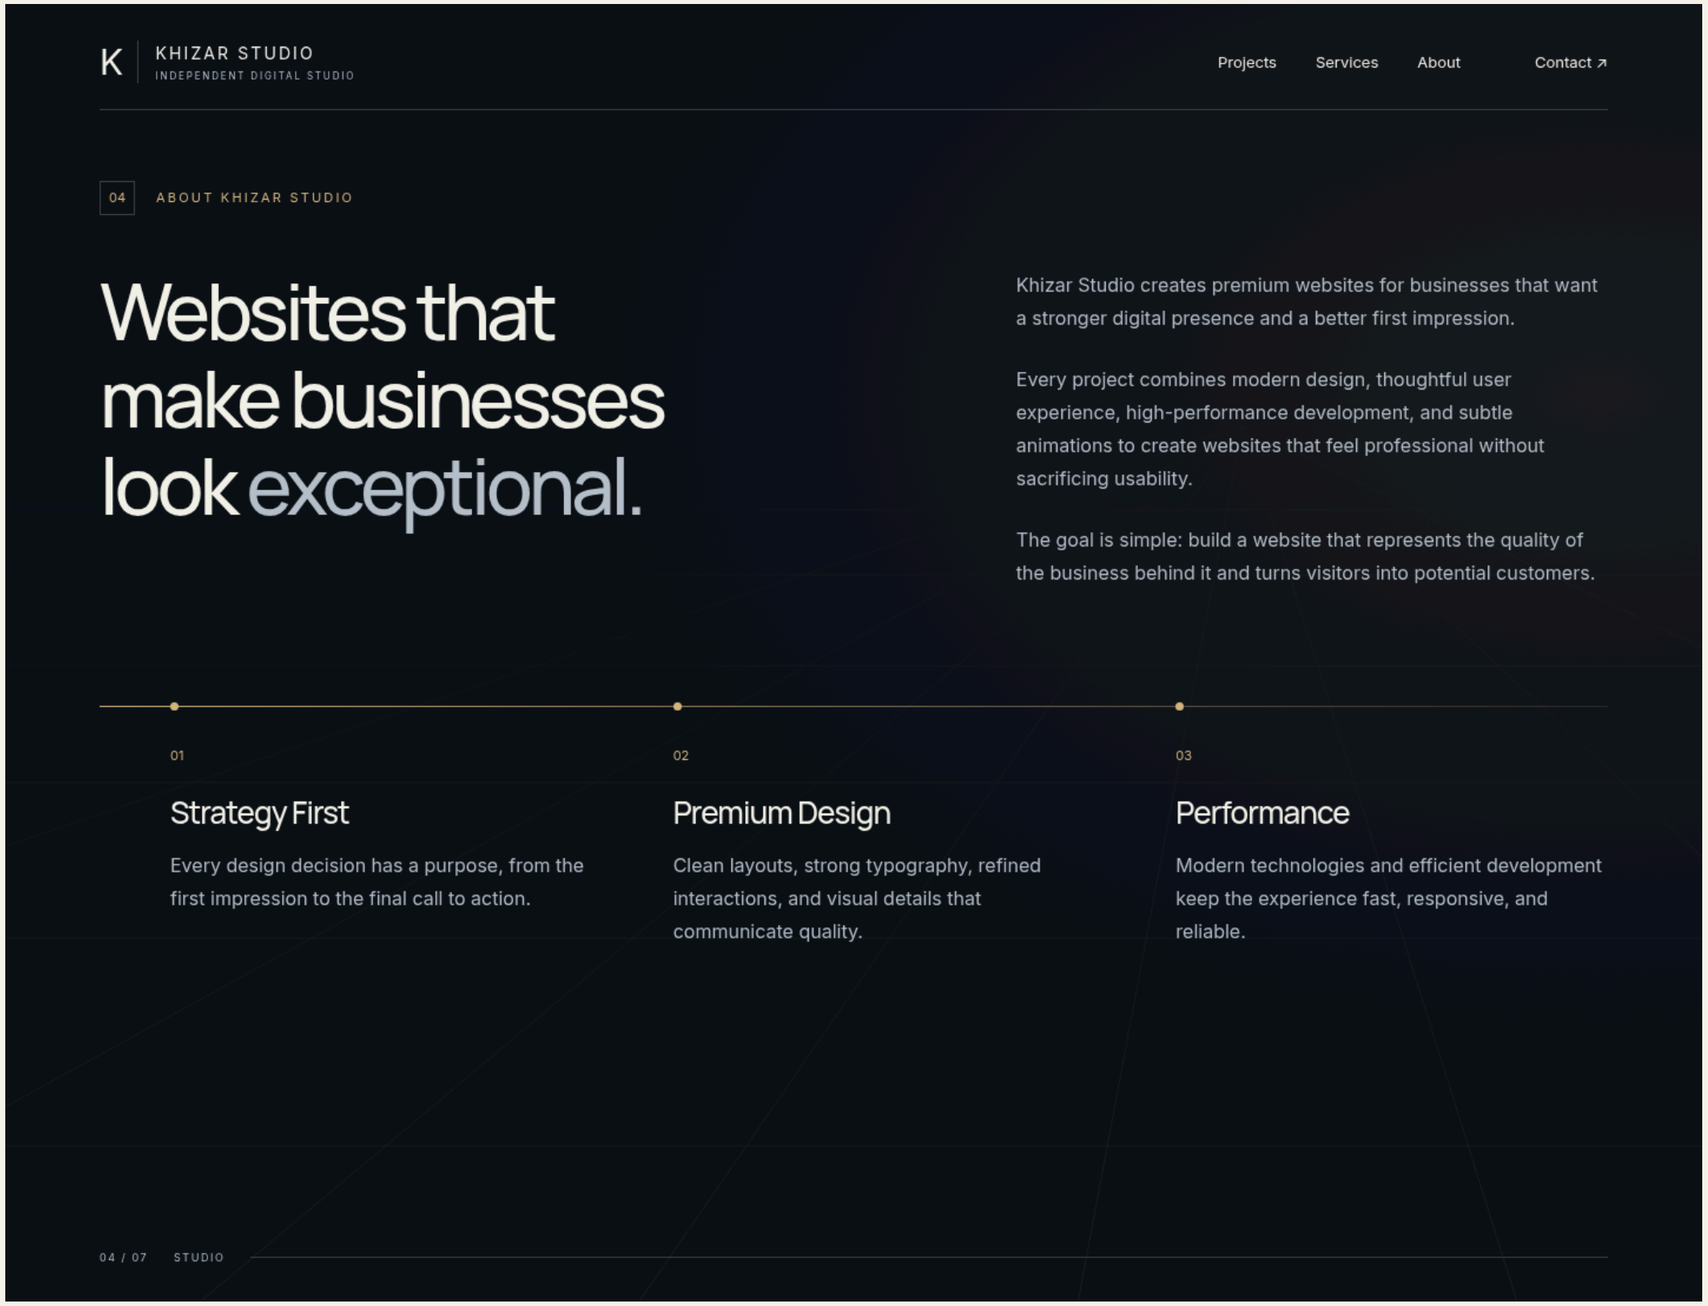

MOBILE / 390PX WIDTH

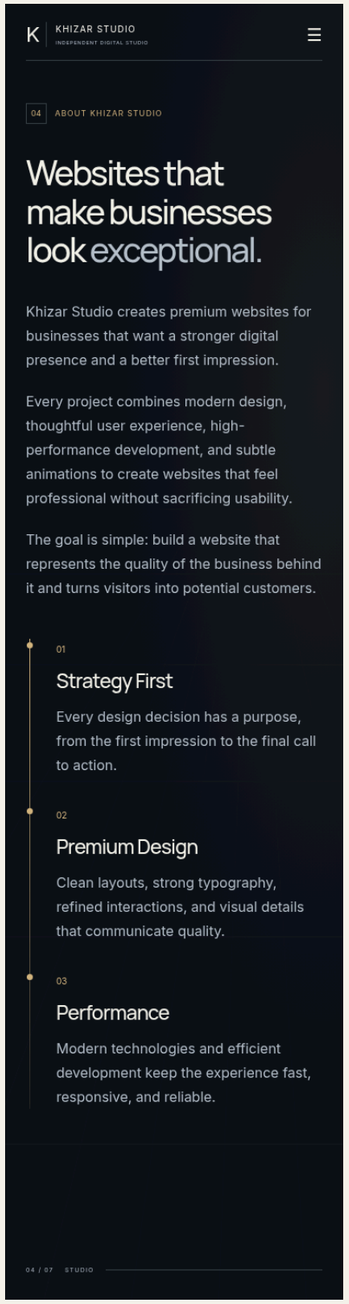

Actual existing project imagery, uncropped and undistorted. A shallow entry tilt settles near front-on for inspection. Copy, concept disclosure, progress, arrows and case-study links remain accessible. These are two states of one showcase, not two new sections. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

04 · An editorial studio, not another card grid

DESKTOP / 1440PX WIDTH

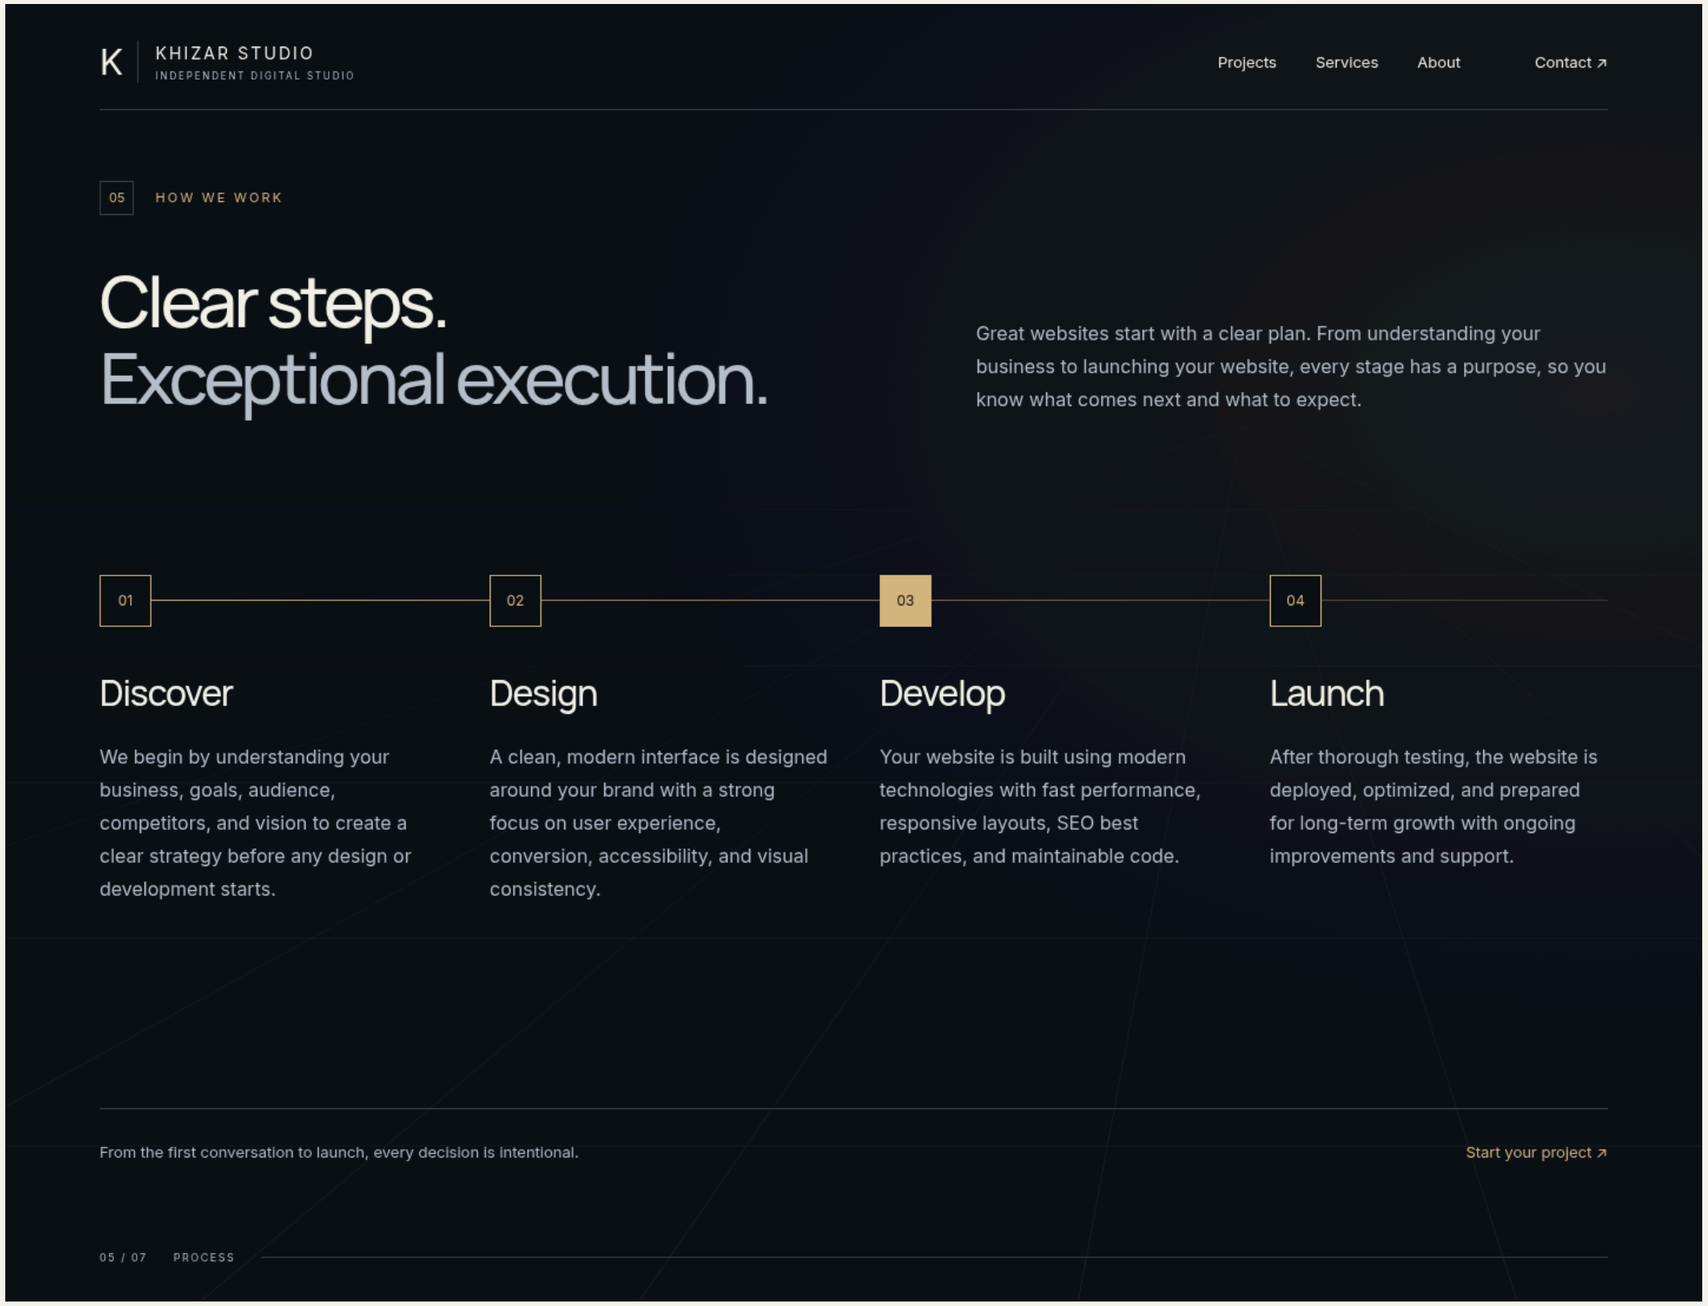

MOBILE / 390PX WIDTH

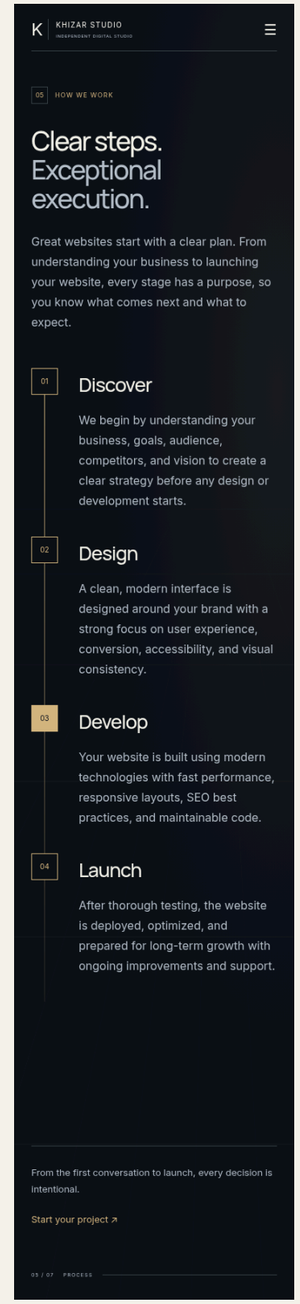

The project ground line carries into a navy reading environment. Copy stays in normal flow. A shared gold axis connects the three values; only its marker and ambient light respond to scroll. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

05 · A connected path with stable descriptions

DESKTOP / 1440PX WIDTH

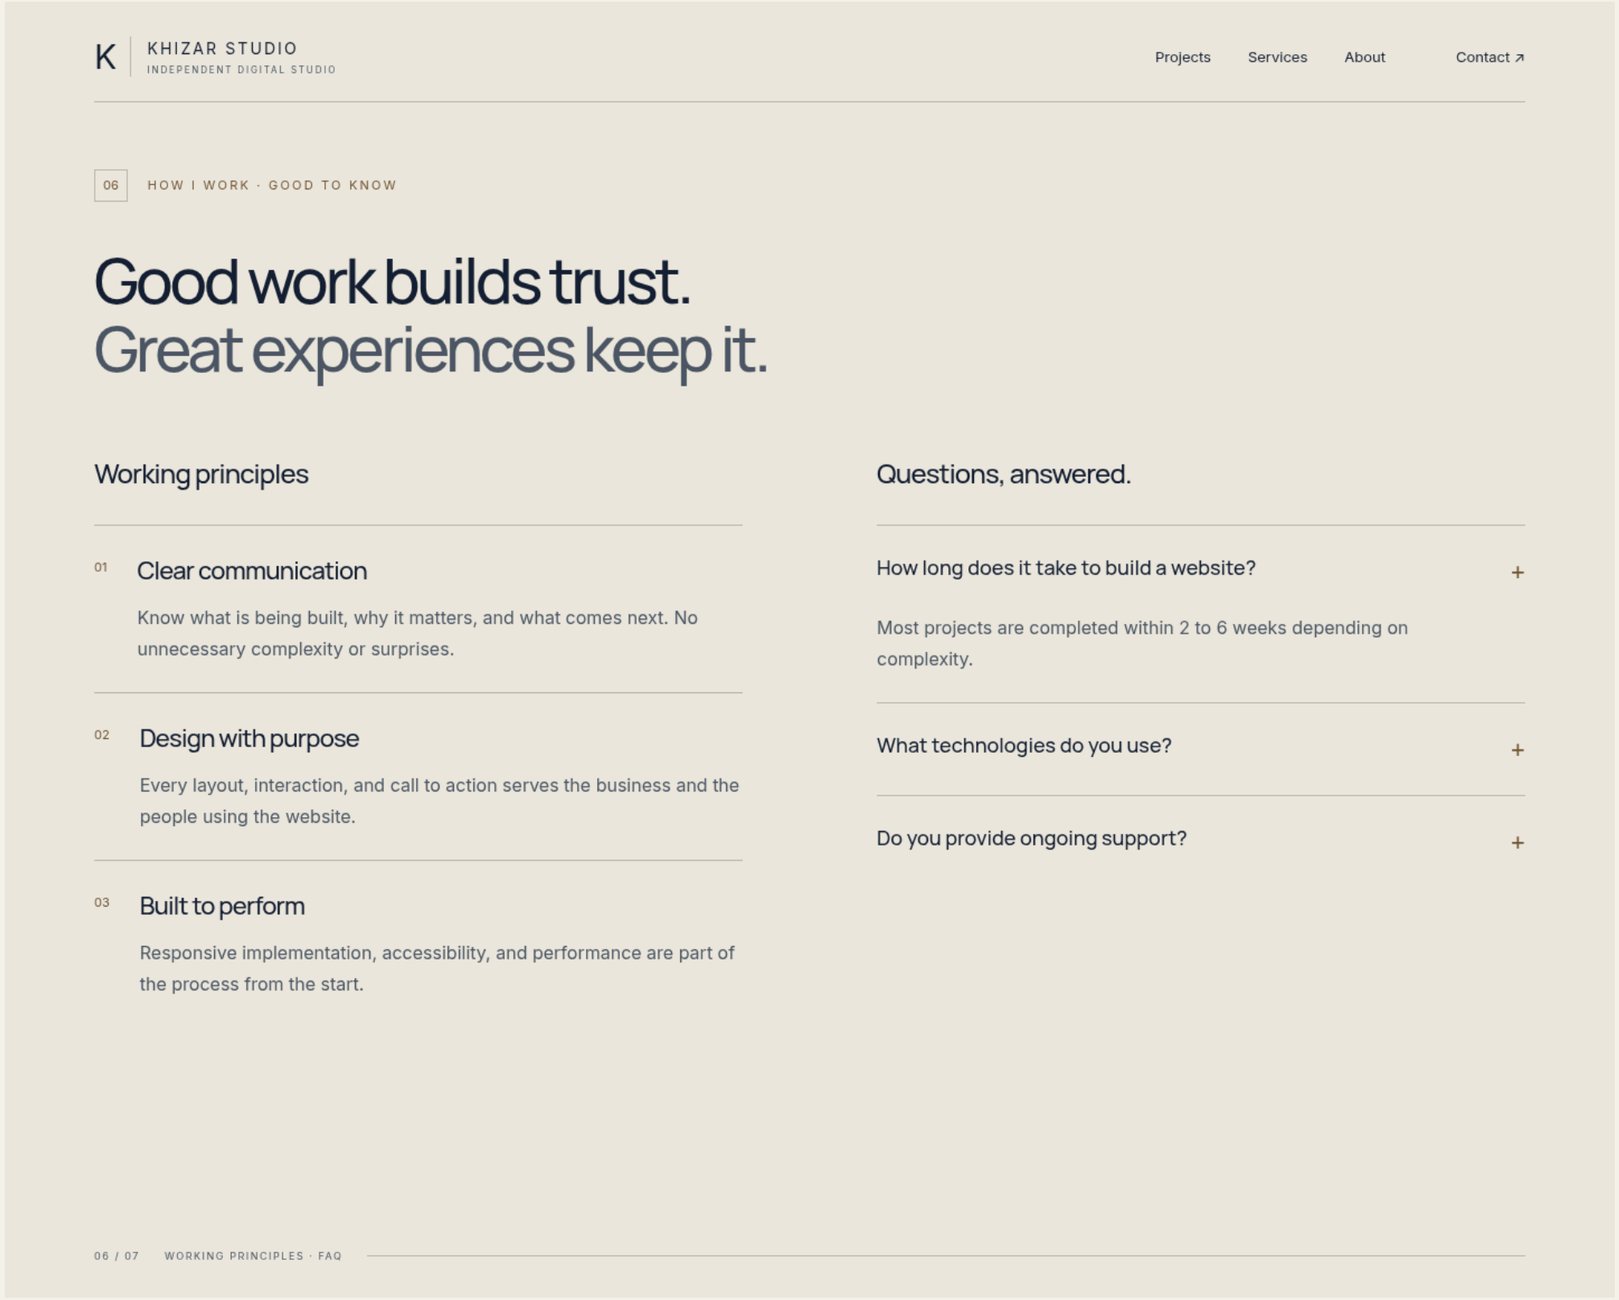

MOBILE / 390PX WIDTH

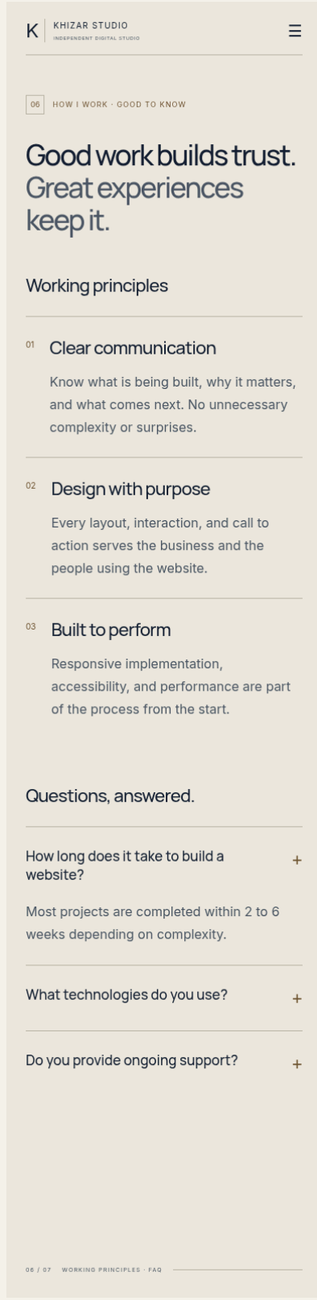

Four steps share one continuous route instead of four animated containers. A marker advances along it; every description is available without waiting for its turn. On mobile the same route becomes a vertical spine. No pin. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

06 · A deliberate pause for reading

DESKTOP / 1440PX WIDTH

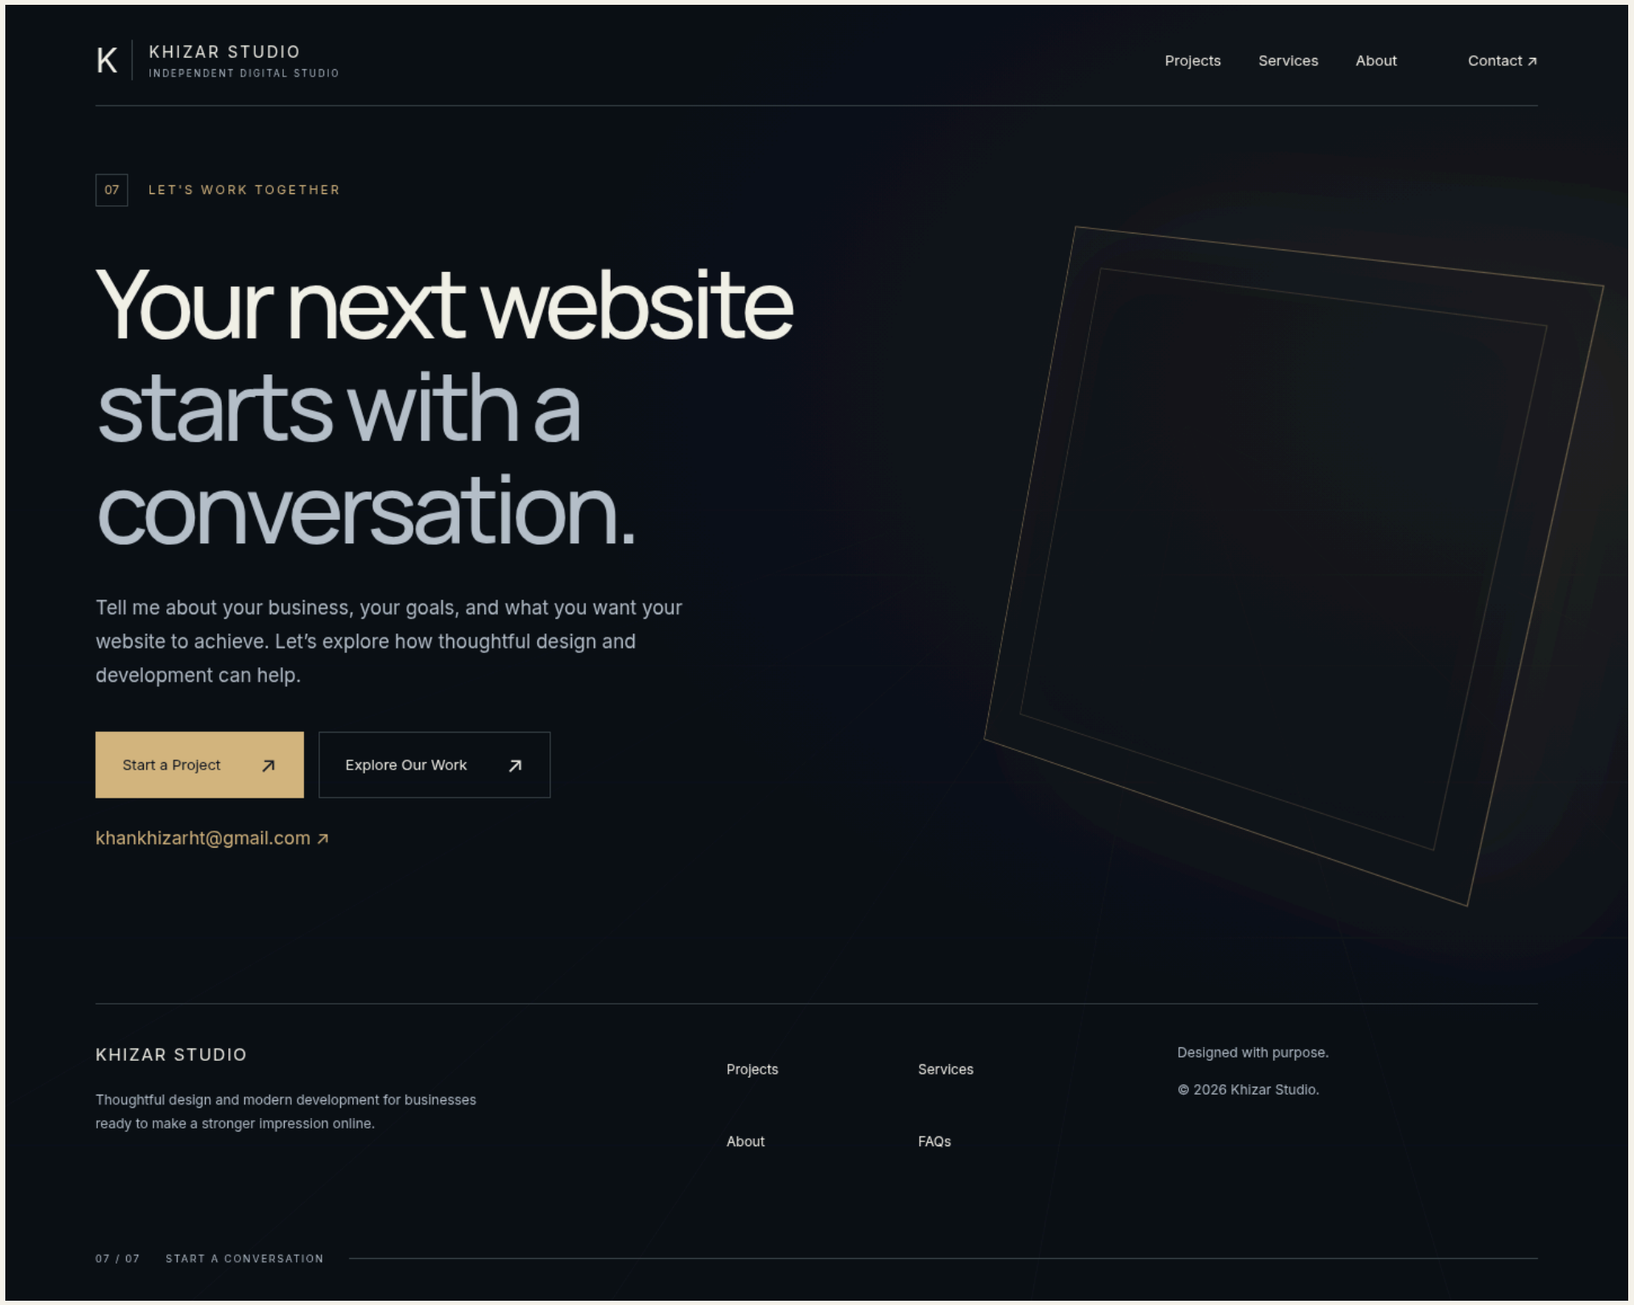

MOBILE / 390PX WIDTH

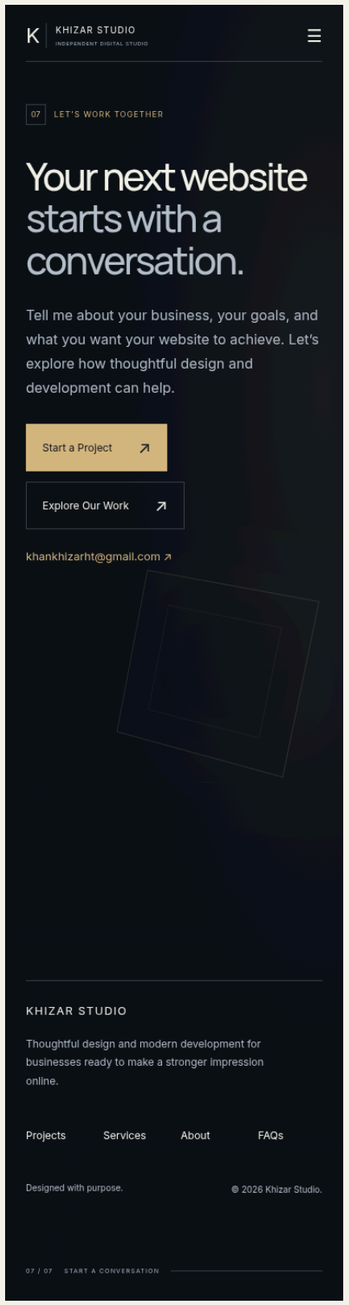

Warm ivory removes spectacle from decision-making content. Fine rules connect principles and FAQ; text remains still. The accordion keeps keyboard activation and expanded-state semantics. All answers remain in the source and accessible on expansion. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

DESKTOP / 1440PX WIDTH

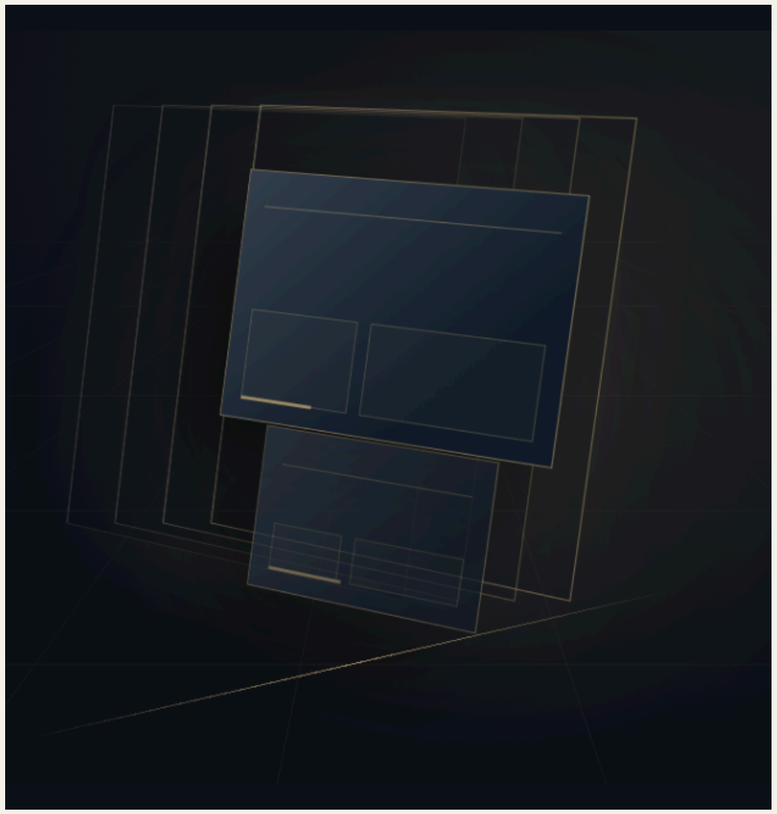

MOBILE / 390PX WIDTH

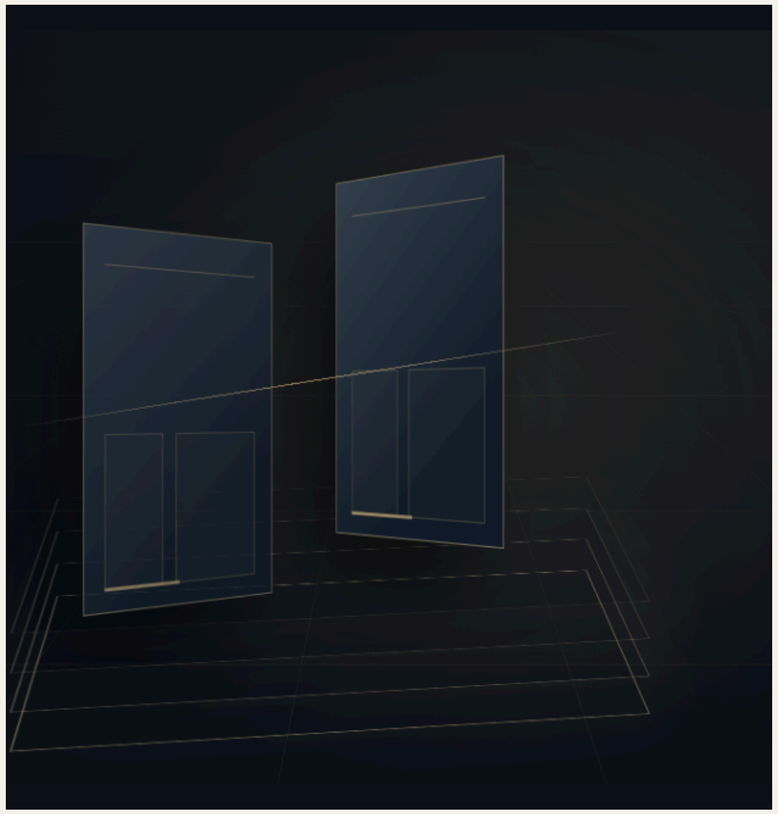

The opening architecture resolves into one quiet frame behind a stable final invitation. Email and project CTA are usable immediately; convergence never gates contact. Footer belongs to the same composition rather than another isolated card. Full-size PNGs are included for closer reading; these are complete composition stills, not seven mandatory viewport-height panels.

Capabilities: change the object’s organization

01 / Design

Layered surfaces align into a visual hierarchy. The caption remains outside the moving object.

02 / Development

The same planes turn into structural elements and connected rails. This is a reorganization, not a new set of cards.

03 / Experience

The structure resolves into one complete interface. Its baseline continues into ivory service dividers.

Start near 20% transformation in / 60% readable hold / 20% handoff. These are design proportions, not a fixed autoplay duration. All stage descriptions remain semantic HTML. Reduced motion uses static stages.

Seven experiences, a restrained scroll budget

EXPERIENCE	CHOREOGRAPHY	READING / ACCESS REQUIREMENT
01 / Hero + laptop	20% · 60% HOLD · 20% Initial hold → architectural passage → protected laptop stages	No new prelude pin. Never change the GLB, hinge, camera, screen fit or progress ref.
02 / Capabilities + Services	20% · 60% HOLD · 20% Layer → connect → resolve → warm ivory	Reuse/reduce the existing story pin only if it improves reading. Services stays normal flow.
03 / Projects	20% · 60% HOLD · 20% Tilt in → near-front inspection → recede	Keep arrows, focus navigation, progress, concept labels and case-study access. No timed exit.
04 / About	SEMANTIC CONTENT REMAINS STABLE Shared line → value axis	Paragraphs and value descriptions stay still. Only the guide/marker moves.
05 / Process	SEMANTIC CONTENT REMAINS STABLE Four nodes along one route	All four descriptions remain available. No hiding inactive steps and no pin.
06 / Principles + FAQ	SEMANTIC CONTENT REMAINS STABLE Calm editorial reading	No cinematic reading gate. Preserve keyboard accordion and reduced-motion behavior.
07 / Contact + Footer	SEMANTIC CONTENT REMAINS STABLE Aperture settles behind an immediate invitation	Email and CTA are ready on arrival. Decorative convergence does not delay contact.

Hold ratios apply to local cinematic moments, not entire page reading time. Keep the laptop’s existing sticky travel and Projects desktop behavior. Do not add seven pins. Pausing or reversing scroll must leave useful content.

Implementation follows approval, not the other way around

1. Approve composition + reading behavior

Review the Hero’s reading/art split, frame language, ivory intervals, screen scale, mobile order and calm reading sections. The source is unchanged; this is not an implemented animation.

2. Establish semantic themes

Scoped text, surfaces, focus colors and navbar treatment. Shared geometry without a giant application-wide Canvas or transformed content ancestors.

3. Implement scene by scene

Hero/laptop, capabilities/Services, Projects, About/Process, then principles/FAQ/Contact. Reuse existing functional architecture and data. Preserve a checkpoint and review normal-speed captures after each batch.

Protected assets and behavior

Existing laptop files/controller. Two project concepts and case studies. All service features, About/Process copy, genuine working principles, FAQ answers, email, anchors and keyboard navigation.

Acceptance before continuing

Readable holds, reverse scroll, direct navigation, mobile and reduced motion, theme contrast, no stale controllers/pins, loading/restoration and measured device behavior.

Written companion

ART-DIRECTION.md includes the structural audit, content register, specific file map, risks, scroll budget, reference interpretation and approval decisions.

No new application code, Batch B, push or deployment in this design study. The next implementation stage needs explicit visual-direction approval. Existing font-download build limitations remain separate from this review.
